

BIG DATA

ESSENTIAL CONCEPTS
AND TOOLS

THURSDAY JUNE 25

2:30-3:30 P.M.
M3 3103

The era of big data is upon us and is used for everything from recommending movies on Netflix to city improvement (Boston's Street Bump App). This talk will discuss some of the essential concepts needed for working with big data as well as a quick introduction to some of the tools commonly used with big data: Hadoop, Spark, Pig, Hive, etc.
